

## SENS Quality Checklist

Criteria	Description	YES	NO
<b>Executive summary</b>	<b>An executive summary is included following recommended format:</b>		
	- Geographic area surveyed, population type, population number (total and U5)		
	- Dates of survey		
	- Objectives		
	- Methodology used (sampling, sample size, main indicators)		
	- Summary of results as shown in the table below, as well as other important results		
	- Brief interpretation of the results		
<b>Introduction</b>	<b>An introduction is included with enough background information following the recommended format:</b>		
	- Geographic description of survey area		
	- Description of the population		
	- Food security situation		
	- Health situation		
<b>SENS objectives</b>	<b>The SENS objectives are worded appropriately (primary and secondary objectives)?</b>		
	<b>Additional objectives</b>	<b>The additional objectives are worded appropriately?</b>	
<b>Methodology</b>	<b>A methodology section is included following the recommended format:</b>		
	- Sample size		
	- Sampling procedure: selecting clusters (where applicable)		
	- Sampling procedure: selecting households and individuals		
	- Questionnaire and measurement methods		
	- Case definitions, inclusion criteria and calculations		
	- Classification of public health problems and targets		
	- Training, coordination and supervision		
	- Data collection		
- Data analysis			
<b>Results</b>	<b>Total number households surveyed included</b>		
<b>Results-Children 6-59 months (Anthropometry, Health and Anaemia)</b>	<b>Total number of children surveyed included</b>		
	<b>Total number of clusters surveyed included (where applicable)</b>		
	<b>Age and sex distribution of children included</b>		
	<b>All Modules 1 and 2 SENS indicators included</b>		
<b>Results-Children 0-23 months (IYCF)</b>	<b>All Modules 3 SENS indicators included</b>		

Criteria	Description	YES	NO
<b>Results-Women 15-49 years (Anaemia)</b>	<b>Total number of non-pregnant women included</b>		
	<b>Total number of pregnant women included</b>		
	<b>Mean age included</b>		
	<b>All Module 2 SENS indicators included</b>		
<b>Results-Food Security</b>	<b>Total households surveyed for food security included</b>		
	<b>All Module 4 SENS indicators included</b>		
<b>Results-WASH</b>	<b>Total households surveyed for WASH included</b>		
	<b>All Module 5 SENS indicators included</b>		
<b>Results-Mosquito Net Coverage</b>	<b>Total households surveyed for mosquito net coverage included</b>		
	<b>All Module 6 SENS indicators included</b>		
<b>Other results</b>	<b>Appropriate information is included about the other objectives measured and analyses</b>		
<b>Limitations</b>	<b>A limitations section is included</b>		
<b>Discussion</b>	<b>A discussion about the results is included following the recommended format (if reduced SENS is done, not all these sections will be included):</b>		
	- Nutritional status of young children		
	- Programme coverage		
	- Anaemia in young children and women		
	- IYCF indicators		
	- Food security		
	- WASH		
	- Mosquito net coverage		
- Other collected information/data			
<b>Conclusions</b>	<b>A conclusion is included</b>		
<b>Recommendations and priorities</b>	<b>Recommendations are listed (recommended are shown twice in the report)</b>		
<b>Appendices</b>	<b>The recommended appendices are included:</b>		
	- SMART Plausibility check		
	- Assignment of clusters (if applicable)		
	- Evaluation of enumerators (results from anthropometric standardisation test)		
	- Result tables for NCHS Reference 1977		
	- Maps of area		
	- Questionnaires		
	- Local event calendar used during the survey to estimate age in young children
