

# SENS List of Objectives

Module	Level of representativity	Primary objectives	Secondary Objectives	Optional Objectives
<b>1- Demography</b>	Household-based	<ul style="list-style-type: none"> <li>To determine the demographic profile of the population;</li> <li>To determine the age dependency ratio.</li> </ul>		
<b>2- Anthropometry and Health</b>	Individual-based	<ul style="list-style-type: none"> <li>To measure the prevalence of acute malnutrition in children aged 6-59 months;</li> <li>To measure the prevalence of stunting in children aged 6-59 months;</li> <li>To determine the coverage of measles vaccination among children aged 9-59 months (or context-specific target group e.g. 9-23 months);</li> <li>To determine the coverage of vitamin A supplementation in the last 6 months among children aged 6-59 months;</li> <li>To determine the two-week period prevalence of diarrhoea among children aged 6-59 months.</li> </ul>	<ul style="list-style-type: none"> <li>To determine the enrolment into the targeted supplementary (TSFP) and therapeutic (OTP/SC) nutrition programmes for children aged 6-59 months;</li> <li>To determine the coverage of the blanket supplementary feeding programme (BSFP) for children aged 6-23/6-35/6-59 months (if applicable);</li> <li>To determine the coverage of deworming (soil-transmitted helminth control) with mebendazole or albendazole in the last six months among young children (include context specific target age group, 12-59m/24-59m) (if applicable);</li> <li>To determine the coverage of the blanket supplementary feeding programme (BSFP) for pregnant women and lactating women with an infant less than 6 months aged 15-49 years (if applicable).</li> </ul>	<ul style="list-style-type: none"> <li>To determine the use of oral rehydration salt (ORS) and/or zinc during diarrhoea episodes in children aged 6-59 months;</li> <li>To determine the prevalence of MUAC malnutrition in women of reproductive age 15-49 years (include if all, pregnant and/or lactating women with an infant less than 6 months are measured);</li> <li>To determine the time of arrival of the children in the camp /asylum country.</li> </ul>
<b>3- Anaemia</b>	Individual-based	<ul style="list-style-type: none"> <li>To measure the prevalence of anaemia in children aged 6-59 months and in women of reproductive age between 15-49 years (non-pregnant).</li> </ul>	<ul style="list-style-type: none"> <li>To determine enrolment into Antenatal Care clinic and coverage of iron-folic acid supplementation in pregnant women.</li> </ul>	
<b>4- IYCF</b>	Individual-based	<ul style="list-style-type: none"> <li>To investigate IYCF practices among children aged 0-23 months.</li> </ul>		

Module	Level of representativity	Primary objectives	Secondary Objectives	Optional Objectives
<b>5- Food Security</b>	Household-based	<ul style="list-style-type: none"> <li>• To determine the populations overall ability to meet their food needs with assistance:               <ol style="list-style-type: none"> <li>a. To determine the duration of the general in-kind food distribution for recipient households (if applicable);</li> <li>b. To determine the coverage of cash grants and how recipient households spent the cash (if applicable);</li> <li>c. To determine the coverage of the food vouchers and how recipient households use the vouchers (if applicable);</li> </ol> </li> <li>• To determine the extent to which negative coping strategies are used by households;</li> <li>• To assess household food consumption (quantity and quality).</li> </ul>	<ul style="list-style-type: none"> <li>• To determine the proportion of households in each of the targeting categories (if applicable);</li> <li>• To determine the population's access to and use of cooking fuel (if applicable).</li> </ul>	
<b>6- Mosquito Net Coverage</b>	Household-based	<ul style="list-style-type: none"> <li>• To determine the ownership of mosquito nets (all types and LLINs) in households;</li> <li>• To determine the utilization of mosquito nets (all types and LLINs) by the total population, children 0-59 months and pregnant women.</li> </ul>	<ul style="list-style-type: none"> <li>• To determine the household coverage of indoor residual spraying in the past 6 months/12 months (if applicable).</li> </ul>	
<b>7- Water, Sanitation and Hygiene</b>	Household-based	<ul style="list-style-type: none"> <li>• To determine the population's access to, and use of, water, sanitation and hygiene facilities;</li> <li>• To determine the population's access to soap.</li> </ul>
